WATER RATES

The City of Hamilton Water System charges customers based upon volumetric usage of water, independent of customer categories (i.e., residential versus commercial), beginning with the first unit of water used during a billing month. Usage is measured in volumes of 100 cubic feet (Ccf) by customer meters. 100 Ccf is equal to 748 gallons of water. The City utilizes Automated Meter Reading (AMR) on a monthly basis.

City water rates also include a monthly Customer Service Charge based upon the size of the customer's water meter(s). The Customer Service Charge serves as the minimum monthly charge for the customer.
